

Market Intelligence Pack

State-by-state investing benchmarks, the rent-to-price screen, and HUD rent benchmarks for the markets TrueCap tracks — the same sourced data that pre-fills every TrueCap analysis.

1. Every state, one table — tax, landlord law, eviction timeline, medians
2. The rent-to-price screen — where state medians still clear 0.7%+
3. HUD rent benchmarks — 2BR/3BR Fair Market Rents by tracked market

Benchmarks, not quotes. Rents are HUD area Fair Market Rents, taxes are state effective-rate estimates, and medians are metro-level — always verify a specific property with local comps, the actual tax bill, and written loan terms before you offer. Generated from the public data behind usetruecap.com/states and [/markets](https://usetruecap.com/markets).

The rent-to-price screen (state medians)

Monthly median rent ÷ median home price, straight from the table above. The classic "1% rule" is rare at state level in 2026 — treat 0.7%+ as "worth screening", then let the full underwrite (not this ratio) make the decision.
